

“A shotgun that is as beautiful as it is functional, as appropriate for the world-class competitor as it is for the novice.”

involved,” a company spokesperson said. “We are obsessed with breaking down the traditional barriers to participation in shooting, hunting and the great outdoors. Our goal is to provide the equipment and knowledge that make the experience more enjoyable and less stressful.”

Reduced weight & bulk

Sometimes heavy and bulky target guns can be an issue, so the overall weight and balance has been calibrated to make the firearm easy to handle. When reducing weight, the recoil must be considered. This has been addressed, resulting in a more comfortable shooting experience. The last, yet equally important feature is the cosmetic attributes of the firearm. Everyone wants an attractive shotgun with beautiful wood and detailed engraving, that is why special attention has been given to make each model as elegant and distinctive as possible – you won’t find any pink paint here.

Tempio Syren

The Tempio Syren has been the first model introduced by Caesar Guerini, a traditional and elegant gun. The non-side plated action features a classic scroll and bouquet design, with roses tastefully highlighted in gold. During the years with the Tempio Syren action Caesar Guerini developed a complete line, for hunting, sporting and trap.

The gun features a semi-deluxe grade of Turkish walnut complemented by a hand rubbed oil finish, providing a lustrous glow to the wood.

The sporting clays over-and-under models are offered in 12 and 20 gauge. The hunting models are offered in both standard and light weight versions in 12, 20 and 28 gauge.

Julia Syren

Recently Caesar Guerini introduced the Julia Syren; the name of this model brings customers back to the splendour of the Roman Empire. Julia, daughter of Julius Caesar, is believed to

have possessed remarkable elegance and personal charms, so, to celebrate a woman’s charisma, Caesar Guerini decided to give her name to its new over and under.

Aesthetically the side plate action elongates the lines of the shotgun, offering a graceful appearance.

A contemporary detailed and unique motif, with gold and coloured engravings, it was designed and realised by Dario Cortini, master engraver at Bottega Giovanelli.

The stock is crafted from a deluxe grade of Turkish walnut with a semi-gloss oil finish to bring out the beauty of the wood. Julia is available in a 12-gauge model.

The sporting clays model is offered with 28 or 30in barrels and it includes a long list of performance features that make it a serious competition capable firearm. Features include specialised stock dimensions to fit the female anatomy with different pitch, smaller pistol grips and Monte Carlo style comb; the barrels feature the bore geometry

called “Maxisbore” that combined with the 5in forcing cone between chambers and bore called “DueCon” allow to reduce recoil and increase ballistic performance. The trigger is adjustable for length-of-reach to allow the ladies to dial in their perfect grip-to-trigger distance. A shotgun that is as beautiful as it is functional, as appropriate for the world-class competitor as it is for the novice.

Julia Syren is also available in a hunting version with steel receiver and options of 26, 28 or 30in barrels.

Apparel

As well as guns for women a line of accessories more closely aligned with what women want out of the gear they take to the shooting range is also available. It includes high quality materials, elegant design with the same feminine touch behind all of the the Syren branded accessories.
