

Invictus II represents revolution for Caesar Guerini

Introducing the Invictus II – Caesar Guerini's latest offering in its expanding line of Invictus target guns, built for the world's most demanding shooters.

ABOUT

Caesar Guerini Srl started in 2000 and is a worldwide leader in fine firearm manufacturing with multiple awards for product excellence. Specialising in over-and-under shotguns entirely produced in Italy, inspired by classic English tradition of gun making, intended for a refined and demanding public who want firearms with impeccable mechanisms, excellent ballistic performance, easy and safe handling features and exacting attention to detail. The Caesar Guerini team are driven by passion, innovation, creativity, care of details and quality of the products for a segment that wants to be sure of "100 per cent Italian made" shotguns.

A number of years ago Caesar Guerini engaged in a study to determine if there was a technical solution for significantly increasing the long-term durability of an over-and-under action. More specifically, the problem of an "off face" condition which is created by the barrel and action wearing to the point that there is an unsafe gap between the two. This condition typically spelled the end of a shotgun's useful wear life. The only true and total solution is the Invictus System.

This revolutionary new system completely changes the way the barrel and action lock together when the gun is closed, making the whole system stronger. Additionally, all locking surfaces are now modular, creating a gun that is many times more durable than a traditional over-and-under

shotgun. For the first time you can measure the lifespan of your shotgun not by how long you can shoot it, but how long your children and grandchildren can.

Since the introduction of the Invictus line of competition over-and-under shotguns, Caesar Guerini has created a number of grades including a I, III, V, and VII. New for this year the company is proud to introduce the Invictus II, a unique addition for the most demanding shooter, who desires a unique look and style.

The action features a case colour hardened finish, accented by an elegant gold wire border design, conceived by a world leader in fine engraving, Bottega Cesare Giovanelli and Director and Master engraver Dario Cortini. The gold border is executed with a revolutionary new process utilising the precise application of electrolytic gold,

with additional accents using solid gold applied by master engravers. The gold line pattern is even extended to the top of the monoblock surface of the barrels.

Finally, the stock is crafted from a semi-deluxe grade of Turkish Walnut and a hand rubbed oil finish is applied to bring out the beauty of the wood. The result is a unique look and style unlike anything else on the target range today.

The Invictus II is available in Sporting and Trap versions with 10x8 flat rib in 12-gauge with 28in, 30in or 32in barrels for these versions, which is also available with the DTS adjustable stock option. Additionally, the Invictus II is offered in an Ascent version with 30in or 32in barrels.
